WELCOME TO THE BEAUTIFUL WORLD OF SENITAP

VISION

Quality is the cornerstone of the SENITAP ethos. Guided by stringent standards and uncompromising attention to detail, we maintain a zero-defect mindset across every stage—from concept development to final delivery. This disciplined approach ensures consistency, reliability, and excellence, earning the trust of architects, designers, and discerning homeowners alike. Looking ahead, SENITAP envisions setting new benchmarks in sanitaryware and bathroom accessories by continuously elevating design sensibilities, embracing advanced technologies, and anticipating the evolving expectations of modern living.

MISSION

At SENITAP, our mission is to curate bathroom experiences that blend contemporary luxury with everyday comfort. We translate refined design sensibilities into meticulously crafted sanitaryware and accessories that enhance personal spaces. Our focus lies in harmonizing form, function, and material excellence to create products that feel intuitive, elegant, and enduring. By embracing innovation and elevated craftsmanship, we respond to the evolving lifestyles of modern homes.

STENOGRAPHIC ARCHITECTURES IN THE BATHROOM

The clean aesthetics of the lines recalls modern architectures and it is enhanced by the thinness of the lever. This is the distinctive feature of flexi. Flexi is available in 3 different versions, all of them perfect for facilitating the activities in the sink area and to enhance the design of the setting that they are integrated into.

DOUBLE PLATING

All SENITAP BATHWARE faucets are Double Plate, which are characterized by a double chroma plating and double nickel plating to grant the product a long life.

EASY TO ASSEMBLE

The installation of the product is easy thanks to clear instruction included.

SOFT MOVE & LONG LIFE

Special Cartridges to ensure smooth movement of single lever faucet. Cartridges and spindles tested for over 5 lakh cycles, assuring long life of faucet.

SENITAP SILK MOVE

Smoothest handling for effortless precision and ultimate comfort for a lifetime.

SENITAP STARLIGHT

Made-to-last surfaces ranging from precious matt to shiny like a diamond.

WARRANTY

SENITAP BATHWARE products are studied in order to strict controls during every step of the production cycle to provide the best guarantee on the quality of the product. For this reason, the SENITAP taps are warranted against manufacturing defects for a period of 12 years.

WATER SAVING UP TO 20%

The SENITAP BATHWARE products are studied in order to allow the maximum water saving but preserving the comfort and usability. With its ranges, SENITAP BATH saves 10 liters of water a day per person (compared with 25 liters on average from a conventional tap) A solution which can save 3650 liters of water per person each year.

WATER SAVING SYSTEM

The taps equipped with the Water Saving System have a flow limiter that, by mixing air and water, is able to reduce water and energy consumption (boiler), without affecting comfort.

In our water saving faucets, we have a flow limiter able to mix air and water. In this way, we can reduce the water and energetic consumption, without losing comfort.

ENERGY SAVING SYSTEM

Energy Saving technology allows rotation of the mixing lever only from right to left.

Therefore, the starting point of the lever (always and only in the centre) prevents the accidental call of hot water and the consequent priming of the boiler.

This allows advantages both in terms of energy and in terms of the duration of the boilers.

CERAMIC CARTRIDGES

All single lever are fitted with European cartridges to ensure outstanding & leaking performance.

FLUID FLOW AERATORS

Foam flow faucets in all ranges are fitted with world leader, NEOPERL- made in Germany, honeycomb aerators that mix air with water to form a stream of aerated water (foam flow) which does not splash or spill.

PREMIUM FINISHES

All SENITAP faucets are made with double plated finish and polished to perfection.

COMFORTABLE HANDLE

All SENITAP faucets operates so smooth with an action to naturally. they also offer precise control of flow and temperature.

OF COURSE, IT'S ALWAYS WHAT'S
BENEATH **THE SURFACE, SIR!**

ALLIED COLLECTION

Allied redefines water control with a collection that blends minimalist design, precision engineering, and enduring strength. Our single lever mixers and diverters are crafted for those who seek both beauty and performance – delivering smooth functionality that complements contemporary living spaces."

TANK PRE-EMBEDDED TERMINATOR

The new generation of smart toilets has added a privacy water tank inside the ceramic body to replace the water tank inside the wall. There is no need to break the wall when there is a problem with the products. So life is easier.

Conceal the fixed iron frame Plastic Tank

No worries about the after-sales problem of the in-wall tank any more, because now buried in the wall is a fixed iron frame, not a traditional hidden water tank.

While adding a plastic tank to the ceramic, please use the big pumper solution to solve the water pressure problem.

INTELLIGENT TOILET

PRECISION IN EVERY PIECE
PURITY IN EVERY DETAIL

Beyond functionality, purity underscores aesthetic refinement. Clean lines, minimalist design, and attention to aesthetic details contribute to the visual purity of the product, creating a sense of elegance and timelessness.

THE ART OF SANITATION,
THE HEART OF YOUR BATHROOM

CONCEALED
CISTERN

A result of our relentless r&d efforts to give you something no other brands would be able to; this is a smart match for your bathrooms. Designed to please even the most hard-to-please consumer, this collection is crafted through fusion of design minimalist and engineering principles.

Adjustable Hanging Hole

It can be adjusted according to the hole position of the toilet, and the fixed hole position of the appropriate position can be selected for installation.

High-density EPS Foam Protective Outer Layer

Buried in the wall together to prevent the cement from being squeezed to the deformation of the box, and there is a mute effect during use.

The Frame Supports 400kg

Thickened bracket, high-strength steel bolts, can bear 400 kg, make sure be stable and safe.

Easy Maintenance

It's easy to repair and replace the internal fittings through the button panel. It's no need to dismantle the wall.

HDPE One-Piece Blow Molding

The water tank is made of high-quality HDPE, with a 25 years quality assurance. high hardness, safe and durable, the tank body has no welding seam to prevent water leakage.

Height-adjustable Stand

Thickened anti-corrosion and anti-rust iron frame, the height can be adjusted according to your bathroom.

High Quality Brass Valve

The water inlet and regulating valve are made of high-quality brass, which is not easy to corrode. and is durable.

NOW, WHY WOULD I SAY NO TO
SOME **MORE PAMPERING, DEAR!!**

ONE PIECE CLOSET

It's a case of instant gratification when you take a look at this exquisite range of bathware. Every single piece is a result of our meticulous design style and penchant for perfection. It is truly a maverick range of urban icon that will decorate your space and delight your soul.

Super is from the inside out

Comprehensive optimization

Fully optimize the internal structure space to give you a clean experience.

HIGH EFFICIENCY CLEAN SYSTEM

360° Vortex Flush

The unique edge design and flushing system flush the water to form a vortex effect, flush the inner wall of the toilet in all directions, and effectively use every drop of water to flush dirt.

Full pipe glaze application

The inner wall of the sewage pipe is glazed 360° in all directions to ensure that the inner wall of the pipe is smooth and free from dirt.

Large Sewage Pipe

Large pipe design, the maximum diameter can reach 60mm. Ensure that the sewage discharge is unobstructed, without clogging, and realize one flush.

Water Saving

Dual-Flush design, one has strong impact and the other saves water, effective use of water resources to achieve efficient water saving, innovative one-key flushing design, only 3.5L per flush

Urea-Formaldehyde Cover

The material is upgraded, and the compressive strength of the cover is greatly improved. It is durable and has a gloss close to ceramic glaze. It feels smooth and does not easily age and fade.

High-Pressure grouting

The automatic high-pressure forming equipment will not cause any damage to the strict requirements of each process, and strive for high quality. every detail is a meticulous manufacturing.

Rimless Design

Ceramic Toilet Bowl without hard-to-reach areas along the top edge

1280° high temperature calcination

Continuous high-temperature calcination improves the quality of UD, makes the ceramic body dense, the water absorption rate of the ceramic surface is very low, the product has high strength, and is not easy to break. It can meet the needs of daily washing and provide you with more quality to enjoy.

Diamond Glaze

Diamond glaze adopts new nano technology, and the firing temperature is strictly controlled above 1280°, which ensures that the surface is extremely smooth, there is no hidden, difficult to reach, and places where bacteria grow. The toilet is easier to clean.

10% of normal cleaning time
10% common cleaner
10% of normal water

Antibacterial, easy to clean, healthy. The scientific glaze formula guarantees the hygienic and antibacterial properties of the surface

MAINTENANCE GUIDE

Care and cleaning guideline for SENITAP Faucets and Sanitary :

DO'S

- Clean the fitting with just a little soap or mild detergent (such as dish washing soap) and a soft dampened sponge or cloth. Then simply rinse off and wipe dry. You can prevent lime scale by drying the fitting after each use.
- Always test your cleaning solution on an inconspicuous area on the product before applying on the entire surface.
- The ideal cleaning technique is to always blot dry water from metal surface. Allowing water to evaporate on and buff drying should keep your faucet looking beautiful and spotless.
- It is important to use a dabbing action action to dry metal, not an abrasive or rubbing action. Cleaning with a damp sponge and buff drying should keep your faucet looking beautiful and spotless.

DON'TS

- Do not use any abrasive sponges or scouring agents for cleaning.
- We also advise against the use of cleaning agents containing ammonia, bleach, acids, waxes, alcohol, solvents or other product not recommended for chrome. Most toilet cleaning products have high acidic content which can damage the chrome finish, leaving it dull and scratched hence they should be strictly avoided.

WARRANTY DETAILS

SENITAP faucets and sanitary use in normal residential and non residential segments are warranted to be free of defects in the material and workmanship for the period of time set forth in the warranty converge tables as detailed below, commencing from the date of sale of SENITAP faucets and sanitary products to the original purchaser.

NEPAL,

IT'S YOUR WAKE UP CALL,
SAVE WATER TODAY.

KNOW WHAT'S PRECIOUS,
DO WHAT'S RIGHT.

#SaveWater #GoGreen

TOP 5 ACTIONS TO SAVE WATER AT HOME

01. REPAIR ANY AND ALL LEAKS IN PIPES AND FIXTURES

Check your indoor water using appliances and devices for leaks. Many silent leaks allow water and your money to go down the drain.

02. INVEST IN WATER SAVING TOILETS

By replacing old, inefficient toilets with Water Sense labeled models, the average family can reduce water used for toilets by 20 to 60 percent—that's nearly 13,000 gallons of water savings for your home every year!

03. DECREASE OUTSIDE WATER USAGE

Most water is wasted in your garden by watering when your plants do not need the water or by not maintaining the irrigation system.

04. PLANT THE RIGHT PLANTS

Whether you are putting in a new landscape or slowly changing the current landscaping at your home, select plants that are appropriate for your local climate conditions.

05. REPLACE YOUR CLOTHES WASHER

Energy Star™ rated washers that also have a Water Factor at or lower than 3.2, use 25% less energy and 33% less water than regular washers per load. This saves you money on both your water and energy bills.
