AN ART PIECE
OF A BATHWARE ARTICLE

Faucets, Sanitaryware, Shower
& Bathroom Accessories

OUR STAND POINT

In a rapidly evolving world of architectural hardware, the rising brand SENITAP has well established itself thanks to its impeccable Quality and Unequivocal designs, An ensemble of high-caliber aesthetic that comes pre-loaded with top notch quality is an irresistible reason for discerning consumers to Vouch for one name only - SENITAP.

The glorious track record of brand SENITAP is replete with numerous hurdles and challenges that we crossed Successfully by adhering to strong business protocols. Our zero tolerance for errors makes us a front-line player in this field and a highly trusted name for the clients. From concept to courier, your products bear the SENITAP benchmark of engineering perfection, design distinction and consumer satisfaction.

In a short span from our inception, we have won many milestones of achievement. Today, paused to take the quantum leap of growth, we envisage ourselves as the Most Preferred brand for those who seek quality, value for money and lifetime of happiness.

**WELCOME TO
THE BEAUTIFUL WORLD
OF SENITAP**

WHY SENITAP

DOUBLE PLATING

All SENITAP BATHWARE faucets are Double Plate, which are characterized by a double chroma plating and double nickel plating to grant the product a long life.

EASY TO ASSEMBLE

The installation of the product is easy thanks to clear instruction included.

SOFT MOVE & LONG LIFE

Special Cartridges to ensure smooth movement of single lever faucet. Cartridges and spindles tested for over 5 lakh cycles, assuring long life of faucet.

SENITAP SILK MOVE

Smoothest handling for effortless precision and ultimate comfort for a lifetime.

SENITAP STARLIGHT

Made-to-last surfaces ranging from precious matt to shiny like a diamond.

WARRANTY

SENITAP BATHWARE products are studied in order to strict controls during every step of the production cycle to provide the best guarantees on the quality of the product. for this reason, the SENITAP taps are warranted against manufacturing defects for a period of 12 years.

WATER SAVING UP TO 20%

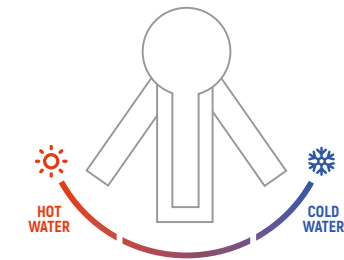

The SENITAP BATHWARE products are studied in order to allow the maximum water saving but preserving the comfort and usability. With its ranges, SENITAP BATH saves 10 liters of water a day per person (compared with 25 liters on average from a conventional tap) A solution which can save 3650 liters of water per person each year.

WATER SAVING SYSTEM

The taps equipped with the Water Saving System have a flow limiter that, by mixing air and water, is able to reduce water and energy consumption (boiler), without affecting comfort.

In our water saving faucets, we have a flow limiter able to mix air and water. In this way, we can reduce the water and energetic consumption, without losing comfort.

ENERGY SAVING SYSTEM

Energy Saving technology allows rotation of the mixing lever only from right to left.

Therefore, the starting point of the lever (always and only in the centre) prevents the accidental call of hot water and the consequent priming of the boiler.

This allows advantages both in terms of energy and in terms of the duration of the boilers.

CERAMIC CARTRIDGES

All single lever are fitted with European cartridges to ensure outstanding & leaking performance.

FLUID FLOW AERATORS

Foam flow faucets in all ranges are fitted with world leader, NEOPERL- made in Germany, honeycomb aerators that mix air with water to form a stream of aerated water (foam flow) which does not splash or spill.

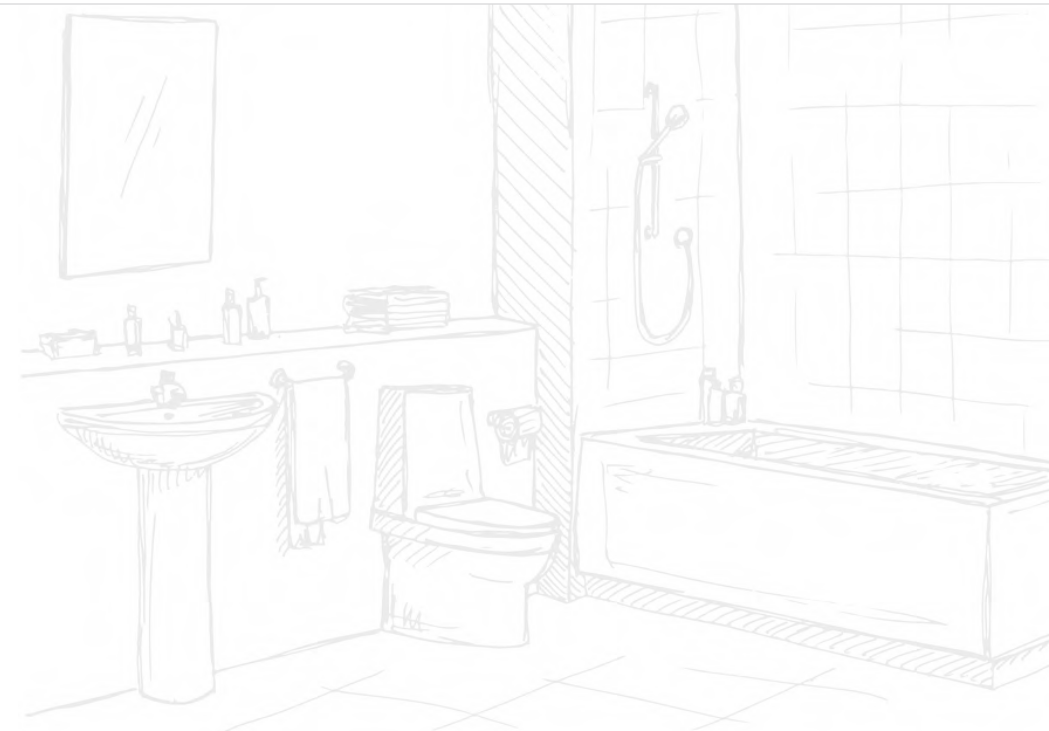

PREMIUM FINISHES

All SENITAP faucets are made with double plated finish and polished to perfection.

COMFORTABLE HANDLE

All SENITAP faucets operates so smooth with an action to naturally, they also offer precise control of flow and temperature.

STENOGRAPHIC ARCHITECTURES IN THE BATHROOM

The clean aesthetics of the lines recalls modern architectures and it is enhanced by the thinness of the lever. This is the distinctive feature of flexi. Flexi is available in 3 different versions, all of them perfect for facilitating the activities in the sink area and to enhance the design of the setting that they are integrated into.

STENOGRAPHIC ARCHITECTURES
IN THE BATHROOM

SENITAP
makes bathroom tip top

SENTOSA
COLLECTION

The clean aesthetics of the lines recalls modern architectures and it is enhanced by the thinness of the lever. This is the distinctive feature of flexi. Flexi is available in 3 different versions, all of them perfect for facilitating the activities in the sink area and to enhance the design of the setting that they are integrated into.

TANK PRE-EMBEDDED TERMINATOR

The new generation of smart toilets adds a privacy water tank inside the ceramic body to replace the in-wall water tank, No need to break up down the wall when there are problems with the products, making life easier.

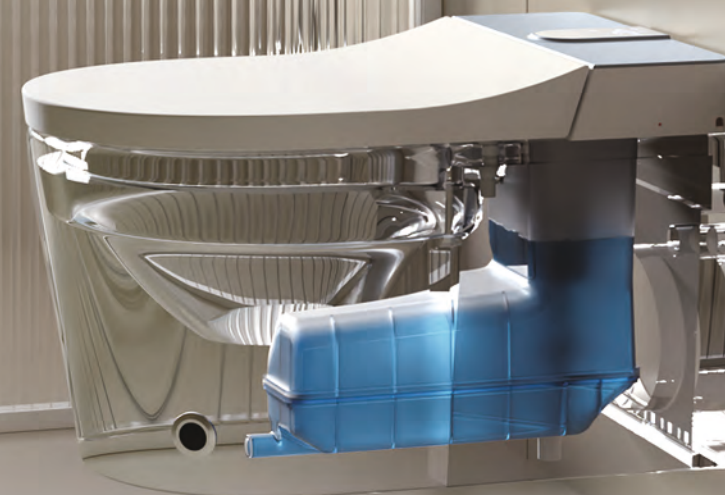

Conceal the fixed iron frame Plastic Tank

No worry about the after-sales problem of the in-wall tank any more, because now buried in the wall is a fixed iron frame, not a traditional hidden water tank.

If add a plastic tank to the ceramic, please use the big pumper solution to solve the water pressure problem.

THE ART OF SANITATION, THE HEART OF YOUR BATHROOM

CONCEALED CISTERN

A result of our relentless r&d efforts to give you something no other brands would be able to; this is a smart match for your bathrooms. Designed to please even the most hard-to-please consumer, this collection is crafted through fusion of design minimalist and engineering principles.

Adjustable Hanging Hole

It can be adjusted according to the hole position of the toilet, and the fixed hole position of the appropriate position can be selected for installation.

High-density EPS Foam Protective Outer Layer

Buried in the wall together to prevent the cement from being squeezed to the deformation of the box, and there is a mute effect during use.

The Frame Supports 400kg

Thickened bracket, high-strength steel bolts, can bear 400 kg, make sure be stable and safe.

Easy Maintenance

It's easy to repair and replace the internal fittings through the button panel. It's no need to dismantle the wall.

HDPE One-Piece Blow Molding

The water tank is made of high-quality HDPE, with a 25 years quality assurance. high hardness, safe and durable, the tank body has no welding seam to prevent water leakage.

Height-adjustable Stand

Thickened anti-corrosion and anti-rust iron frame, the height can be adjusted according to your bathroom,

High Quality Brass Valve

The water inlet and regulating valve are made of high-quality brass, which is not easy to corrode. and is durable.

SOME **MORE PAMPERING, DEAR!!**

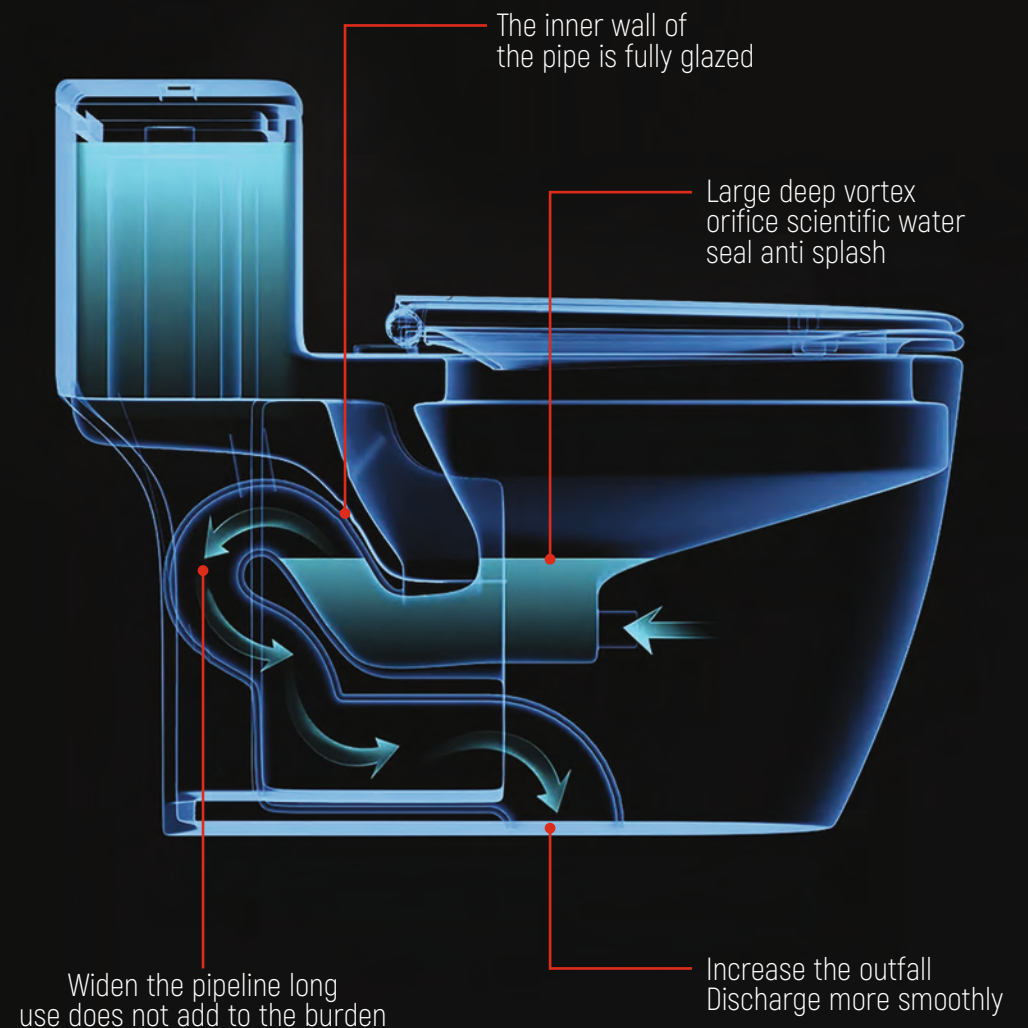

ONE PIECE CLOSET

It's a case of instant gratification when you take a look at this exquisite range of bathware. Every single piece is a result of our meticulous design style and penchant for perfection. It is truly a maverick range of urban icon that will decorate your space and delight your soul.

Super is from the inside out Comprehensive optimization

Fully optimize the internal structure space to give you a clean experience.

HIGH EFFICIENCY CLEAN SYSTEM

360° Vortex Flush

The unique edge design and flushing system flush the water to form a vortex effect, flush the inner wall of the toilet in all directions, and effectively use every drop of water to flush dirt.

Full pipe glaze application

The inner wall of the sewage pipe is glazed 360° in all directions to ensure that the inner wall of the pipe is smooth and free from dirt.

Large Sewage Pipe

Large pipe design, the maximum diameter can reach 60mm. Ensure that the sewage discharge is unobstructed, without clogging, and realize one flush.

Water Saving

Dual-Flush design, one has strong impact and the other saves water, effective use of water resources to achieve efficient water saving, innovative one-key flushing design, only 3.5L per flush

Urea-Formaldehyde Cover

The material is upgraded, and the compressive strength of the cover is greatly improved. It is durable and has a gloss close to ceramic glaze. It feels smooth and does not easily age and fade.

High-Pressure grouting

The automatic high-pressure forming equipment will not cause any damage to the strict requirements of each process, and strive for high quality. every detail is a meticulous manufacturing.

Rimless Design

Ceramic Toilet Bowl without hard-to-reach areas along the top edge

1280° high temperature calcination

Continuous high-temperature calcination improves the quality of the product, makes the ceramic body dense, the water absorption rate of the ceramic surface is very low, the product has high strength, and is not easy to crack. It can meet the needs of daily washing and provide you with more quality for you to enjoy.

Diamond Glaze

Diamond glaze adopts new nanotechnology, and the firing temperature is strictly controlled above 1280°, which ensures that the surface is extremely smooth, there is no hidden, difficult to reach, and places where bacteria grow. The toilet is easier to clean.

10% of normal cleaning time
10% common cleaner
10% of normal water

Antibacterial, easy to clean, healthy. The scientific glaze formula guarantees the hygienic and antibacterial properties of the surface

MAINTENANCE GUIDE

Care and cleaning guideline for SENITAP Faucets and Sanitary :

DO'S

- Clean the fitting with just a little soap or mild detergent (such as dish washing soap) and a soft dampened sponge or cloth. Then simply rinse off and wipe dry. You can prevent lime scale by drying the fitting after each use.
- Always test your cleaning solution on an inconspicuous area on the product before applying on the entire surface.
- The ideal cleaning technique is to always blot dry water from metal surface. Allowing water to evaporate on and buff drying should keep your faucet looking beautiful and spotless.
- It is important to use a dabbing action to dry metal, not an abrasive or rubbing action. Cleaning with a damp sponge and buff drying should keep your faucet looking beautiful and spotless.

DON'TS

- Do not use any abrasive sponges or scouring agents for cleaning.
- We also advise against the use of cleaning agents containing ammonia, bleach, acids, waxes, alcohol, solvents or other product not recommended for chrome. Most toilet cleaning products have high acidic content which can damage the chrome finish, leaving it dull and scratched hence they should be strictly avoided.

WARRANTY DETAILS

SENITAP faucets and sanitary use in normal residential and non residential segments are warranted to be free of defects in the material and workmanship for the period of time set forth in the warranty converge tables as detailed below, commencing from the date of sale of SENITAP faucets and sanitary products to the original purchaser.

WARRANTY FOR FAUCETS :

FOR RESIDENTIAL USE :	FOR COMMERCIAL USE :	SHOWER USE :
		

WARRANTY FOR SANITARY WARE :

FOR RESIDENTIAL USE :	FOR COMMERCIAL USE :
	

MAINTENANCE GUIDE

- The Warranty period is not renewed or extended on supply of the spare parts during the warranty. The company will at sole discretion, repair any defective component without cost.
- The company or its authorized service franchise solely can service / repair the product.
- The Warranty becomes null and void if installation is not done by a qualified and experienced technician and / or as per the installation procedure laid down by the company.
- Hoses, rubber parts, plastic parts and consumables are not included in warranty.
- This warranty will cover only manufacturing defects of the product and will not cover any defects arising out of factors out of control of the company, like insufficient water pressure, high water impurities / hardness, breakage of parts due to excessive force etc. In no event shall the liability of the company exceed the purchase price of the product. Improper care and cleaning avoid the warranty.

CLAIMS AND REPAIRS

- To submit and or avail a warranty claim, please contact Customer Service to sevrvice@senitap.com

bathdot
connecting bathroom

AN ADMIRABLE COMBINATION OF **FUNCTION & STYLE**

Born from the passion for innovation and for experimentation, with elegant and refined lines based on minimalistic concepts that fits perfectly into the contemporary bathroom. Working on aesthetics and functionality, stylistic and technological evolutions are carried out, the design of the components is more refined and the incisiveness of the almost sculptural forms is clearly visible. There is a wide choice available to ensure maximum stylistic and formal customization in the bathroom environment: with pull down faucets, with flat or stylish spout. A solution that guarantees great functionality in the daily use.

NEPAL,

IT'S YOUR WAKE UP CALL,
SAVE WATER TODAY.

KNOW WHAT'S PRECIOUS,
DO WHAT'S RIGHT.

#SaveWater #GoGreen

TOP 5 ACTIONS TO SAVE WATER AT HOME

01. REPAIR ANY AND ALL LEAKS IN PIPES AND FIXTURES

Check your indoor water using appliances and devices for leaks. Many silent leaks allow water and your money to go down the drain.

02. INVEST IN WATER SAVING TOILETS

By replacing old, inefficient toilets with WaterSense labeled models, the average family can reduce water used for toilets by 20 to 60 percent—that's nearly 13,000 gallons of water savings for your home every year!

03. DECREASE OUTSIDE WATER USAGE

Most water is wasted in your garden by watering when your plants do not need the water or by not maintaining the irrigation system.

04. PLANT THE RIGHT PLANTS

Whether you are putting in a new landscape or slowly changing the current landscaping at your home, select plants that are appropriate for your local climate conditions.

05. REPLACE YOUR CLOTHES WASHER

Energy Star™ rated washers that also have a Water Factor at or lower than 3.2, use 25% less energy and 33% less water than regular washers per load. This saves you money on both your water and energy bills.
